WHY EMIR?

Industry standard application

- Specifically designed for the electro-mechanical industry from over 20 years of customer feedback.

Integrated Modules and Extensions

- EMIR links processes and departments seamlessly eliminating re-typed and duplicated work, standardises the way your staff process orders and creates a central hub where business decisions can be made from real 'live' information

UK and International Case Studies

- With over 2,000 users Worldwide, EMIR has a diverse and enthusiastic following. As an EMIR client, you buy into years of development that will make your business easier to run and if its change you aspire to, our development teams are on hand to configure your experience personally.

A History of EMIR

EMIR began life in 1994, as a bespoke application designed to solve the needs of an electro-mechanical services company in Dunstable. It wasn't long before we realised that the electro-mechanical industry had little in the way of a standard solution and with significant investment, the EMIR system was born. Now in its 20th year, EMIR has a world-wide following and continues to adapt and diversify into all aspects of electro-mechanical products and services: facilitating sales, service, hire and batch manufacture processes. Available in three EMIR flavours, "Easy", "Standard" and "Professional"; you can be sure that there is a solution designed to fit your business.

Take a look – have a no obligation demonstration at your premises.
